Tell our Senators to Support  
**Strong Climate Provisions in the Farm Bill**

The 2023 Farm Bill presents an important opportunity to create a food and agricultural system that provides healthy food for all while helping to avoid a climate crisis and improving equity for consumers and producers.

We're joining allies in the faith and farming communities to redirect 2023 Farm Bill funding to promote conservation and climate-smart regenerative farming practices that protect the health of our soil and food, redirect funds to small-scale operations, fight climate change, and make our agricultural and food system more equitable and secure.

We urge Senators to strengthen programs in the 2023 Farm Bill that help avoid climate change while providing healthy food for all and supporting farmers with the greatest need for assistance.
